

Capability Statement

Strive Civil Engineers offers strong proactive leadership teams to deliver civil projects.

Established in 2023 to provide a fresh, accountable, valued civil contractor with a broad range of capabilities.

With 20 years' experience in the civil engineering industry, we are perfectly placed to deliver a valuable product for our clients.

Services provided:

- Marine, civil and rail works
- roadworks including earthworks, drainage and in situ concrete structures
- reinforced concrete construction
- piling, foundation installation and repair
- bridge construction and associated works such as tilt panel installation
- structure and environmental remediation

Our strong stakeholder focus, effective communication and work ethic mean that we are committed to long-term working relationships with our clients.

Company Values

- Safe and environmentally sound work practices
- Accountability
- Team work to promote efficiencies in construction methods
- Relationship building

Safety

Strive Civil Engineers prioritises providing and maintaining a safe working environment.

Strive Civil Engineers develops site specific safety management plan to implement controls and procedures eliminating risk.

Risk mitigation is considered before arriving on site, however, continual improvement and editing of the management plan and safety documentation is expected throughout each project.

This safety management plan serves as a catalyst to provide clear and effective communication and compliance with company policy and legislation.
